1 Introduction

1.1 Real-world Context

2 Background

3 Model Description and Boundary Form

In this section, nm is used to refer to nautical miles rather than nanometres.

3.1 Model Assumptions

3.2 Spatial Domain and Policy Setup

harvest function, determining how much is harvested based off fish position

4 Numerical Method and Validation

4.1 Numerical Implementation

4.2 Validation

5 Baseline Results

6 Sensitivity Analysis

7 Conclusion
